

Manjima Prasad PJ

ReactJs Developer

9400666191

manjimaprasad22@gmail.com

website: <https://manjima-prasad.com>

A dedicated software developer with strong expertise in React.js and foundational knowledge in Node.js, Express, and MongoDB. Demonstrates a quick learning ability and excels in fast-paced, collaborative environments. Proficient in RESTful API design and integration, ensuring seamless backend communication. Possesses a robust capability to execute the full Software Development Life Cycle (SDLC) effectively.

Skills

ReactJS , Redux , REST API , i18next , Material UI , HTML, CSS ,Bootstrap, Git, EmailJs, vite, Tailwind, Firebase, TypeScript, Shadcn , AI tools like Chatgpt, Lovable AI, Github copilot

Experience

React JS Developer

Hybrhind (Alhind Group of Companies), Calicut

2025 Jan-present

- Developed a feature-rich CRM using React, TypeScript, and shadcn/ui, inspired by modern design systems like Lovable AI.
- Implemented complex form handling with react-hook-form and zod for robust type-safe validation.
- Built a user-friendly money exchange web app to manage multi-currency transactions across branches.

React JS Developer

2024 July-2024 Dec (Freelance)

Axobis Technologies, Calicut

- Led a team of 3 developers in the successful implementation of a robust ERP system, ensuring timely delivery and adherence to project requirements.
- Implemented Redux for efficient state management across the application, enhancing performance and maintainability while reducing unnecessary re-renders by 30%.
- Integrated WEB APIs for seamless communication between the frontend and backend, facilitating real-time data exchange and improving user experience by 25%.

Junior Software Engineer

2023 Jan-2024 July

Hexeam Software Solutions, Sahya cyber park, Calicut

- Developed high-quality code in alignment with established guidelines, effectively debugging and optimizing performance to reduce error rates by 30%.
- Documented code changes comprehensively, resulting in improved team collaboration and reduced onboarding time for new developers by 20%.
- Implemented state management using Redux for complex applications, which improved user experience by reducing loading times by 25% and minimizing unnecessary re-renders.
- Integrated APIs using Axios, successfully connecting multiple data sources, which improved data retrieval efficiency by 40% and facilitated real-time data updates within applications.

MERN Stack Intern

Sep 2022 - Dec 2022

Futura Labs, Calicut

- Developed responsive user interfaces using React.js.
- Implemented design consistency using CSS frameworks like Bootstrap and Material-UI.
- Set up and managed server-side applications with Node.js and Express.js.
- Created and maintained RESTful APIs for CRUD operations.
- Secured APIs with JWT-based authentication and authorization.
- Designed and maintained MongoDB databases using Mongoose.

Projects

Customer relationship management project

- Built a scalable CRM platform tailored for diverse services including abroad study consulting and holiday packages.
- Integrated REST APIs for real-time sync of leads, bookings, document uploads, call integration, call recording, and detailed lead tracking across multiple service verticals.

Forex project

- Engineered a responsive money exchange app to manage multi-currency transactions and rate settings across branches.
- Implemented UI components in React and TypeScript, with strong form validation using Zod.

Restaurant ERP

- Developed a Restaurant ERP system that provides a real-time overview of key metrics such as sales, inventory levels, and recent orders, enhancing decision-making speed by 40% for restaurant management
- Created detailed reports on sales performance, inventory status, and financial summaries, enabling comprehensive analysis that improved forecasting accuracy by 30%.

Trip planning and booking project

- Handled 6 modules and implemented new features and played a crucial role in bug fixing
- Implemented a dashboard application for data visualization using React.js, providing users with real-time insights through interactive charts and graphs
- Implemented Localization using i18next
- Deployed in AWS.
- Integrated payment gateway using react RazorPay

Auditorium Booking Register

- Developed an Auditorium Booking Register application to manage auditorium bookings, Utilized the DayPilot library for an intuitive event scheduler interface
- Integrated Firebase for the backend, ensuring real-time data synchronization and reliable storage.

Consultation booking project

- Implemented state management using Redux for the Consultation Booking project, optimizing data flow and improving application performance, which led to a 20% reduction in load times and enhanced user experience.

Service booking project

- Converted an existing Service Booking project from Vue.js to React, enhancing performance and maintainability, which reduced load times by 30% and improved user retention.
- Integrated a payment gateway using RazorPay, enabling seamless transactions and increasing transaction success rates by 25%, resulting in higher customer satisfaction and retention.

Languages

English , Malayalam, Tamil

Achievements

- GitHub: Pull Shark Badge
- Digital Badges:

https://www.cloudskillsboost.google/public_profiles/f453072c-0d0c-48a0-8c8b-7c68b4045dc3

- Google cloud schwags
- Attended Ethical Hacking Workshop from IIT Madras

Certification

Completed 4 month MERN stack course from Futura Labs

Education

Btech - Information Technology

Government Engineering College Idukki
2018 to 2022
